

THE GAZETTE.

SATURDAY EVENING, JULY 2, 1870.

MISCELLANEOUS ITEMS.—The faculty of law just added to Georgetown College completes it as a university, which has conferred the honorary degree of LL. D. on Judge James, of the Treasury, and Gen. Thomas Ewing, of Ohio.

Rev. "Gin-and-Milk" Smythe is lecturing on "Temperance" as contradistinguished from total abstinence. This gentleman's peculiar misfortune is evidently not knowing how to let bad enough alone.

Application is made to Congress to pay the funeral expenses of the late Secretaries of War Rawlins and Stanton. The undertakers' bills are a pillage, as they are in many public funerals, but it is better to pay them.

Cream of Tartar is said to be occasionally made up entirely of plaster of Paris, (sulphate of lime,) starch and sulphuric acid. A quantity purchased recently of a New York grocer was composed of the above ingredients, and contained not even a trace of real cream of tartar or bi-tartrate of potash. This is certainly adulteration extraordinary.

It is finally settled that there is to be a colored cadet at West Point, as James William Smith, the colored boy from Columbia, S. C., has passed the examination and gone into camp with his white comrades.

An attempt has been made, with a fair prospect of success, to repeal the monopoly now granted in the charter of the cable telegraph from Key West to Cuba, owing to the exorbitant charges made by the existing company.

THE WEED.

FAMILY FAVORITE.

We would call the attention of our friends in Alexandria and vicinity to the fact that we have opened at 922 Pa. ave., bet 9th and 10th streets, Washington, an establishment for the exclusive sale of the above popular and justly celebrated SEWING MACHINE.

The WEED is pronounced by every one
The most simple,
The most durable,
The most economical,
The most rapid,
The most beautifully constructed and lightest running machine in use.

The WEED uses a perfectly straight needle; makes the elastic lock stitch exactly alike on both sides; requires no screw driver, wrench, or tool of any kind in setting the needle; has no springs about shuttle, tension, thread-controller or feed; uses upper and under thread the same size, and will sew with equal ease and facility upon everything from the finest lace to the coarsest material—cotton, woolen, leather and boards of more than a quarter of an inch in thickness.

The WEED was awarded the Highest Prize and Diploma at the Paris Exposition, in 1867, over eighty-two competitors; also the highest Prize and Diploma at the American Institute, New York, and Philadelphia, 1869, over all competitors; and later, at the Maryland Institute Fair, Baltimore, November, 1869, after a contest of over four weeks with some of the most celebrated machines in the country, the Weed was again crowned with the highest honors and awarded the Gold Medal.

The Weed is sold at the lowest cash price on the most accommodating terms. Persons in search of the best machine should not fail to examine the Weed before purchasing any other.

WALTHAM WATCHES.
The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these time-keepers.

More than 150,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularly mention:

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning, necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public.

To those living in all portions of the U. S. where watchmakers do not abound, watches with the above-mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch guaranteed by the Company. To prevent imposition, buyers should see that every watch should bear either of the following trade marks:

American Watch Co., Waltham, Mass.
Amn. Watch Co., Waltham, Mass.
American Watch Co., Waltham, Mass.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application.

No watches retailed by the Company. Address,
ROBBINS & APPLETON,
Gen. Agts., 182 Broadway,
NEW YORK.

Ask to see the new FULL-PLATE WATCH, bearing the trade mark "AMERICAN WATCH CO." It is by far the best full-plate watch made in the United States, and surpasses any thing heretofore made in this country for Railway Engineers, Conductors, &c. ap 19-eom

FERTILIZERS.

WHITELOCK'S VEGETATOR!

CONTAINING,

IN A SOLUBLE CONDITION, EVERY ELEMENT NECESSARY TO THE GROWTH OF THE PLANT AND THE FORMATION OF THE GRAIN.

Each article entering into the composition of the Vegetator

IS A MANURE BY ITSELF, and are all carefully analyzed before they are used.

WE OWN OUR MANUFACTORY, give attention to every detail of its preparation, and hence

KNOW EVERY BAG which leaves our Works comes fully up to the standard, which twenty-five years' experience in the trade satisfies us forms

A PERFECT MANURE.

THE VEGETATOR is prepared with great care from the best materials which our resources enable us to command, is uniform in quality, and in good condition for drilling.

Thus combining in proper proportion the stimulating and nourishing properties, and while the plant is furnished with food for its present growth, there is held in reserve a sufficient quantity of nourishment to supply the grain or pod to maturity.

We recommend its application on
WHEAT,
FRUIT TREES, and
GARDEN VEGETABLES.
